

HEALTH SCREENING

Medical Report and Examination

The Doctor will ask questions, assess any medical condition, examine patient, give advice and a **MEDICAL REPORT** will be given to you.

Blood Tests

- 1) **SIMPLE** Investigations
- Diabetes, Kidney, Cholesterol, Gout + Urine analysis
- 2) **BASIC** Investigations
- **SIMPLE** investigations + Blood disorders, Liver + Urine analysis
- 3) **EXECUTIVE** Investigations
* For **ladies**
(**BASIC** + Hepatitis A & B, Connective Tissue disease screen, Thyroid, Arthritis, Syphilis, Cancer markers for liver & colon, **breast tumour CA 15.3**) + Urine analysis + Stool for blood
* For **men**
(**BASIC** + Hepatitis A & B, Connective Tissue disease screen, Thyroid, Arthritis, Syphilis, Cancer markers for liver & colon, **prostate PSA**) + Urine analysis + Stool for blood

Please note that Cancer Markers are expensive blood test that is currently not proven to be a useful screening tool in picking up tumors/cancers except in High Risk Patients. We suggest you speak to your doctor for his or her advice.
